Professional Summary

Researching how AI reshapes design systems, design-to-code workflows, and trust between humans and machines. I architect infrastructure for agentic design systems, ship functional prototypes that validate logic and edge cases from day one, and build tools that accelerate design-to-code workflows. Featured articles published in Design Systems Collective. 900+ installations of my open-source Claude skills. 10+ years at the intersection of design and code.

Key Skills

Complex Systems Design | Agentic Design Systems | Code-Based Prototyping | AI-Assisted Workflows | AI-Assisted development | Research-Driven Design | Cross-Functional Collaboration

Languages

Spanish - Native | English - B2

Work Experience

Enara Health - Design Engineer **Sep 2023 to present**

- Architected Enara's agentic design system infrastructure (machine-readable metadata, codebase indexing, AI protocols). Validated approach with benchmark studies: 2.5x faster component discovery, 54% higher accuracy vs. baseline AI-assisted workflow, 90%+ precision in generative UI.
- Led the member app redesign grounded in a clinical study on key success factors in telehealth weight care. Consolidated core actions, resulting in +29% appointment clicks, +13% progress views, and +25% more members using logging tools.
- Redesigned Enara's website, contributing to 16.5% growth in active members and 230% more partner submissions.
- Directed Enara's brand refresh, aligning clinic assets, sales decks, and digital platforms under a unified identity and standardized design patterns.

Honda - Web Designer - UX Consultant **Dec 2022 to Feb 2024**

- Led user research for Honda Services redesign (463 owners, 74.6% completion rate). AI-assisted analysis crossing demographic, behavioral and attitudinal data. Discovered 61% of loyal customers didn't know the platform existed, surfaced behavioral insights that enabled a go-to-market strategy shift.
- Designed landing pages that drove a 30% lift in leads for Honda's latest cars and motorcycles.

Featured Research & Articles

- "Towards an agentic design system" – Design Systems Collective (Medium) – Jan 2026
- "Building an AI-Ready Design System" – Featured on Design Systems Collective (Medium) – Dec 2025
- "Can You Actually Systematize AI-Assisted Design Workflows?" – Bootcamp (Medium) – Dec 2025

Shipped

Open source tooling **2025**

- Built a Claude skills plugin that superpowers design to code workflows and enables the functional layers for agentic design systems with 900+ downloads via NPM.
- Published a Figma plugin that adds code syntax generation. Essential for Figma to code and token management pipelines.
